# Jose Luis
# De  Avila

*Front-end developer*

## CAREER OBJECTIVES

I am a front-end developer with more than 3 years working on projects (personal and professional) to achieve goals. Working together to ensure both my personal growth and that of the company. Creating solutions in the most optimal and efficient way to guarantee great results.

## SPECIALIZATIONS

- Web development languages (HTML, CSS, JavaScript and TypeScript)
- ReactJS (NextJS and Gatsby)
- Angular
- Working with good development practices applying design patterns, testing, algorithms and clean architecture.
- Back-end with NodeJS (ExpressJS) and PHP (Laravel)
- Relational and Non-relational databases (MySQL, MongoDB)
- Basic knowledge of infrastructure with AWS
